

Functional safety of control systems

Safety Flash Published on 27 January 2011 Generated on 28 January 2026 IMCA SF 01/11

Updated August 2023

The Australian National Offshore Petroleum Safety Authority (NOPSA) has recently published Safety Alert 45 regarding the functional safety of control systems.

The safety alert is designed to raise awareness of possible problems with control systems for cranes, diving systems, pipe handling equipment etc., and may be of relevance to IMCA member's.

Read the safety alert [here](#).

IMCA Safety Flashes summarise key safety matters and incidents, allowing lessons to be more easily learnt for the benefit of the entire offshore industry.

The effectiveness of the IMCA Safety Flash system depends on the industry sharing information and so avoiding repeat incidents. Incidents are classified according to IOGP's Life Saving Rules.

All information is anonymised or sanitised, as appropriate, and warnings for graphic content included where possible.

IMCA makes every effort to ensure both the accuracy and reliability of the information shared, but is not be liable for any guidance and/or recommendation and/or statement herein contained.

The information contained in this document does not fulfil or replace any individual's or Member's legal, regulatory or other duties or obligations in respect of their operations. Individuals and Members remain solely responsible for the safe, lawful and proper conduct of their operations.
