

Diving decompression chambers – not fit for purpose

Safety Flash Published on 30 January 2013 Generated on 17 January 2025 IMCA SF 03/13

The International Association of Oil & Gas Producers (IOGP) has published the following Safety Flash regarding a number of air decompression chambers that have been identified during verification audits that contain serious safety hazards.

The report is available from the IOGP on request to publications@iogp.org.

IMCA Safety Flashes summarise key safety matters and incidents, allowing lessons to be more easily learnt for the benefit of the entire offshore industry.

The effectiveness of the IMCA Safety Flash system depends on the industry sharing information and so avoiding repeat incidents. Incidents are classified according to IOGP's Life Saving Rules.

All information is anonymised or sanitised, as appropriate, and warnings for graphic content included where possible.

IMCA makes every effort to ensure both the accuracy and reliability of the information shared, but is not be liable for any guidance and/or recommendation and/or statement herein contained.

The information contained in this document does not fulfil or replace any individual's or Member's legal, regulatory or other duties or obligations in respect of their operations. Individuals and Members remain solely responsible for the safe, lawful and proper conduct of their operations.
