Please be advised that from the date of this letter Divex Limited will no longer supply loose filter materials to enable customers to re-fill filter cartridges for use in high pressure breathing air compressors.

It has long been the policy of our principals, Bauer Kompressoren, that only factory supplied and sealed filter cartridges should be used in their breathing air compressors.
These cartridges were never designed to be opened and re-filled by operators.

We are aware that some users operating in remote areas have been carrying out this procedure in the interests of economy and logistics, but recent incidents involving other than factory supplied cartridges have highlighted the inherent danger of this practice.

We apologise for any inconvenience this may cause to our compressor operating customers but I am sure you will see the wisdom of our actions.

For and on behalf of Divex Limited,

SIGNED _____ DATED: 6th August 2003
G. Gilbert, for and on behalf of Divex Ltd.

IMCA Safety Flashes summarise key safety matters and incidents, allowing lessons to be more easily learnt for the benefit of the entire offshore industry.
