

Near-miss during anchor line recovery

Safety Flash Published on 23 December 2011 Generated on 25 April 2025 IMCA SF 14/11

The Marine Safety Forum (MSF) has published Safety Flash 11-38 regarding a near miss incident during anchor line recovery.

A large anchor chain snapped and the inboard end came back onto the deck out of control, almost hitting some of the crew.

The complete safety flash is now available [on request](#) from the Marine Safety Forum.

IMCA Safety Flashes summarise key safety matters and incidents, allowing lessons to be more easily learnt for the benefit of the entire offshore industry.

The effectiveness of the IMCA Safety Flash system depends on the industry sharing information and so avoiding repeat incidents. Incidents are classified according to IOGP's Life Saving Rules.

All information is anonymised or sanitised, as appropriate, and warnings for graphic content included where possible.

IMCA makes every effort to ensure both the accuracy and reliability of the information shared, but is not be liable for any guidance and/or recommendation and/or statement herein contained.

The information contained in this document does not fulfil or replace any individual's or Member's legal, regulatory or other duties or obligations in respect of their operations. Individuals and Members remain solely responsible for the safe, lawful and proper conduct of their operations.
